

NETWORKING FOR RESEARCHERS

Networking for researchers is run by EURAXESS Czech Republic, a service designed to assist foreign researchers in the Czech Republic with all aspects of their life here.

Do you work in research, in the public or private sector? Do you ever wish you had the opportunity to meet others in your field from other firms and institutions? Now is your chance! Networking for researchers brings together foreign and Czech researchers from across the whole country who are working in your field. Come along for a stimulating talk, refreshments, and the chance to make new contacts, soak up inspiration, and discuss research matters. The events are free of charge but please register your intention to attend by visiting www.euraxess.cz

Everything you ever wanted to know about science, research and innovation in the Czech Republic, but were afraid to ask the Deputy Prime Minister
